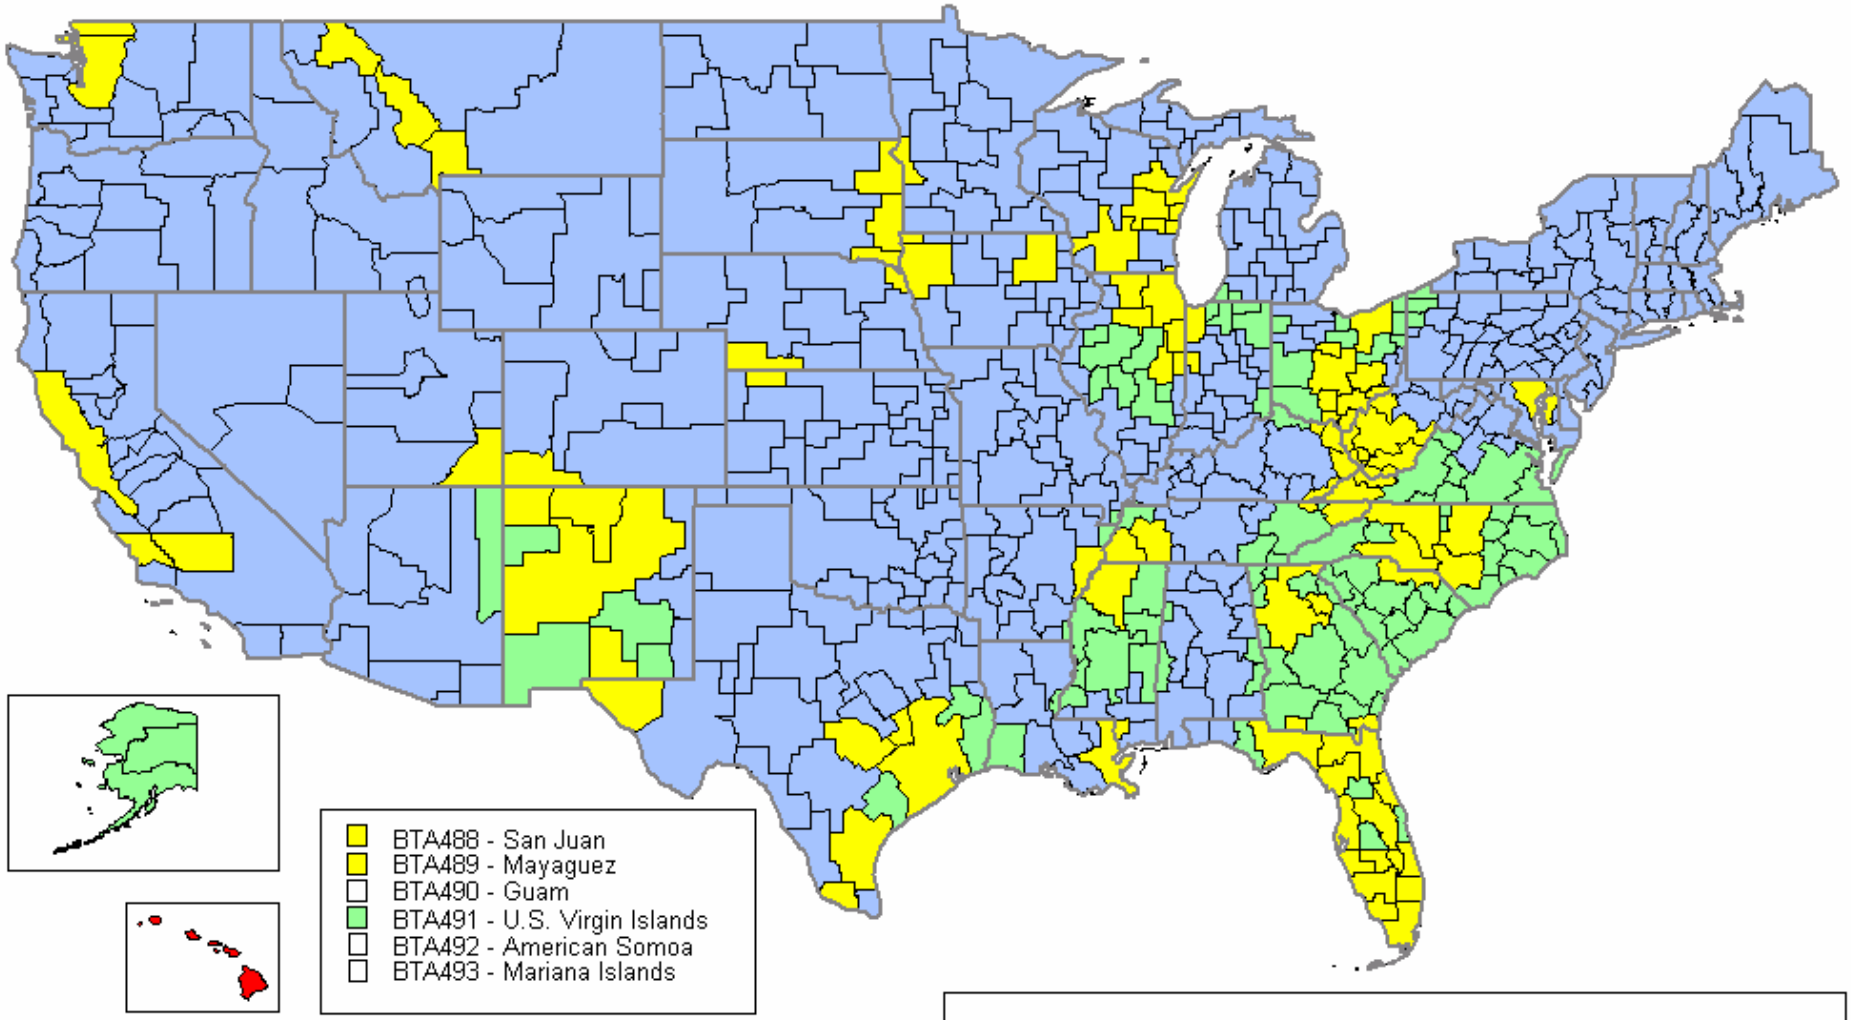
COMBINED SPECTRUM POST-800 MHz REBANDING

Sprint 1.9 GHz + Nextel 800 MHz, 900 MHz and 1.9 GHz (including Nextel Partners 800 MHz)*



*Nextel's post-band reconfiguration spectrum position at 800 MHz is represented as 14 MHz. This value is likely an overstatement of its future 800 MHz spectrum position across the U.S., but due to uncertainties of the future allocation of spectrum in the Border markets, impact of non-Nextel ESMRs (Southern LINC, Nextel Partners, and others) and non-Nextel EA licensees who will share the 800 MHz ESMR block with Nextel, Nextel provides the highest possible value it can own and operate on in the future 800 MHz band.

COMBINED SPECTRUM
Sprint 1.9 GHz + Nextel 800 MHz, 900 MHz and 1.9 GHz (including Nextel Partners 800 MHz)*

- 60 to 70 MHz
- 50 to 60 MHz
- 40 to 50 MHz
- 30 to 40 MHz
- 20 to 30 MHz
