Waivers/Conditions:		
Antenna structures for land, base and	fixed stations authorized for oper	ation at temporary unspecified locations may be erected

without specific prior approval of the Commission where such antenna structures do not exceed a height of 60.96 meters (200 feet) above ground level; provided that the overall height of such antennas more than 6.10 meters (20 feet) above ground, including their supporting structures (whether natural formation or man-made), do not exceed any of the slope ratios set forth in Section 17.7(b). Any antenna to be erected in excess of the foregoing limitations requires prior Commission approval. Licensees seeking such approval should file application for modification of license. In addition, notification to the Federal Aviation Administration is required whenever the antenna will exceed 60.96 meters (200 feet) above the ground and whenever notification is otherwise required by Section 17.7 of the Commission's Rules. Such notification should be given by filing FAA Form 7460-1, Notice of Proposed Construction or Alteration, in duplicate, with the nearest office of the Federal Aviation Administration, which form is available from that office.

Grant of FB8 status is conditional on licensee meeting loading requirement. The Commission may, without notice or hearing, change the station class code to remove the protection status of FB8 facilities based on the loading/operational status of the facilities at construction deadline.

Authorized by waiver of rule 90.307(d) that protects adjacent channel TV stations K21DO-D and KPBS-TV. The waiver allows for mobile operations not less than 75.3 kilometers from adjacent channel TV station K21DO-D granted 2/24/2023. MB concurs with this request.
