Waivers/Conditions:

Antenna structures for land, base and fixed stations authorized for operation at temporary unspecified locations may be erected without specific prior approval of the Commission where such antenna structures do not exceed a height of 60.96 meters (200 feet) above ground level; provided that the overall height of such antennas more than 6.10 meters (20 feet) above ground, including their supporting structures (whether natural formation or man-made), do not exceed any of the slope ratios set forth in Section 17.7(b). Any antenna to be erected in excess of the foregoing limitations requires prior Commission approval. Licensees seeking such approval should file application for modification of license. In addition, notification to the Federal Aviation Administration is required whenever the antenna will exceed 60.96 meters (200 feet) above the ground and whenever notification is otherwise required by Section 17.7 of the Commission's Rules. Such notification should be given by filing FAA Form 7460-1, Notice of Proposed Construction or Alteration, in duplicate, with the nearest office of the Federal Aviation Administration, which form is available from that office.

Grant of FB8 status is conditional on licensee meeting loading requirement. The Commission may, without notice or hearing, change the station class code to remove the protection status of FB8 facilities based on the loading/operational status of the facilities at construction deadline.

Prior to the operation of a temporary station from this authorization, the licensee must ensure that, given the parameters it will use, the station is compliant with all rules, including rule 90.305(a), antenna height, and ERP limitations. Such temporary authorization is secondary in accordance with rules 90.137 and 1.931.

Authorized by waiver of rule 90.307(d) in accordance with PN 20291 on 11/9/2022. Mobiles may not operate within 97 km of TV station KTLN-CD.

Authorized by waiver of rule 90.307(d) granted 8/28/2023
