**Waivers/Conditions:**

This authorization is issued under the condition that harmful interference will not be caused to Federal government stations. - NOTE: Federal government stations may be transitioning to narrowband operations and most are required to do so by Jan. 1, 2005, i.e., operating 12.5 kHz bandwidth equipment--in some cases using center frequencies "offset" 12.5 kHz from your center frequency(s). Federal government stations are licensed by the National Telecommunications and Information Administration (NTIA). For information on the Federal government's transition to narrowband operations, go to NTIA's Office of Spectrum Management home page at: <http://www.ntia.doc.gov/osmhome/osmhome.html> Non-Federal licensees should note that operation of "25 kHz equipment" increases the likelihood of causing interference to Federal government stations. If interference is caused, non-Federal users must cease operating and modify operations so as not to cause harmful interference to Federal government stations.
