Subject: Request for STA

Please review and authorize the frequencies for temporary use for the upcoming Democratic National Convention in Philadelphia, PA.

BearCom is providing up to 800 two way radios for the event in Philadelphia from July 11, 2016 thru August 5, 2016. The two way radios are being used by operations, security, and medical personnel that are responsible for the welfare of the patrons that attend their event.

The frequencies in the application have been scanned and have been determined clear for use in the vicinity of Wells Fargo Center and the Philadelphia Convention Center, where the events will take place. BearCom understands that we are being issued these frequencies as secondary use and that if any interference with licensed users occurs, we will cease transmission on the interfering frequency or frequencies.

I am available during normal business hours if there are questions or concerns regarding the Bearcom request. I can be reached at 800-541-9333.

Respectfully,

Dennis Gonzalez  
Director of Rental Operations  
BearCom  
4009 Distribution Dr, Bldg. 200  
Garland, TX 75041
