Notes:

(1) With regard to BRS availability, Applicants have relied upon notifications filed in WT Docket No. 06-136 and Universal Licensing System ("ULS") records regarding the status of particular markets. For AWS availability, Applicants have used the latest Excel data provided by NTIA, dated December 5, 2011, showing the status of Federal systems in the 1710-1755 MHz band (see <http://www.ntia.doc.gov/category/aws-1710-1755-mhz-transition>). Applicants mapped the data and determined the links defined by the point-to-point systems. AWS spectrum has been shown as unavailable in any county where there is an unrelocated Federal facility or where NTIA indicates that a link between two Federal endpoints crosses through the county.

(2) Where AWS-1 spectrum is not considered to be "available" in a particular market, Verizon Wireless has excluded its current and proposed AWS-1 holdings from its pre- and post-transaction totals. Even if AWS spectrum were available in the counties where it is currently unavailable, attribution to Verizon Wireless of the AWS spectrum already held in addition to that spectrum being acquired would not trigger the Commission's initial spectrum screen.

(3) In Yavapai County, Arizona, Verizon Wireless' pre- and post-transaction spectrum totals include spectrum to be acquired from Leap Wireless in a transaction pending before the FCC. See ULS File Nos. 0004952444, 0004949598, and 0004949596.
