

## Extended Implementation

In accordance with FCC rules Title 47, Part 90, section 90.629, Jasper County requests an extended implementation period to implement its new public safety radio communication system. The system will be a multi-site, wide-area Project 25 Phase II supporting public safety agencies within Emanuel County. Due to the complexity in deploying a large communication system, it is expected to take up to 3 years to put the system into operation and fully transition users. The plan below details the proposed deployment schedule of the system.

Action	Projected Completion Dates
Contract Executed	December 31, 2022
Equipment Shipped	March 30, 2025
System Optimization	June 30, 2025
System Testing	September 30, 2025
Cutover to New System	December 31, 2025

The following table shows the proposed deployment of base stations and subscribers on the new system.

Year	Total Site Deployment	Total Station Deployment	Total Subscriber Deployment
2023	0	0	0
2024	0	0	0
2025	4	28	1000

Jasper County will provide an annual update to the FCC as to the progress of the system implementation.
