**Reference: File # A0826038 – 250' self-support communications tower & appurtenance
w/ FAA style E lighting – SW 1/4 NE ¼ Section 7/T27N/R3W
Highway 19 North – Winona, Missouri 65588**

Please be advised that I oppose the construction of the above mentioned communications tower on the basis that it will be a visual eyesore. Our area has already been degraded by the installation of at least 4 other communications towers.

This area of the Ozarks is known for its pristine, unspoiled beauty, with undulating, wooded hills and clear-running streams. I moved to this area because it was natural and not “polluted” by all the visual trappings of city living.

I am requesting that permission to build this tower be denied, for the reasons stated above.

Thank you.

Anne Guelker
