RE: Renewal of STA Call Signs WRKB251, WRKB253, WRKB254, WRKB435,
WRKB436, WRKB437, WRKA848 and WRKA850

As Oklahoma Department of Public Safety (OKDPS) authorized representative and consultant, I am submitting this renewal letter on their behalf.

I am pleased to inform FCC that OK DPS' network for all sites and all radio units under above mentioned call signs have been deployed and are operational.

I must note that the renewal of these call signs will allow OKDPS to continue operating while the State of Oklahoma 700MHz RPC's plan modification is under review at the PSHSB. As soon as FCC grants the 700MHz RPC Plan and incorporate the returned State License Channels, OKDPS will immediately apply for permanent authorizations.

If you have any questions, please call or email me at (407) 333-2300 or ali.shahnami@acdtelecom.com.
