

Dear Mr. Connolly & Ms. Baghdad and others listed above:

I take strong exception to your rejection of my Request For Environmental Review. I followed your procedures and stated my objection very clearly. No lengthy verbiage is required on my part

to explain what a visual eyesore another cell tower would be. If the purpose of opening the comments up to the public is to receive and consider legitimate feedback from the public, then that is what

I did. I feel very strongly that "big business" is railroading this tower thru the channels. In a rural area, the lack of zoning or no need for permits, as well as the other excuses you list, are not sufficient reasons to allow this tower to be built.

Have you visited the Winona area? Have you spoken with the ordinary citizens? We treasure our natural scenery. We have too many cell towers already.

Attempt to ruin another area if you wish, but do not do it to Shannon County !
