FEDERAL COMMUNICATIONS COMMISSION

ATTN: Public Safety and Homeland Security Bureau

1270 Fairfield Road

Gettysburg, PA 17325

To Whom It May Concern:

BRYAN, CITY OF - UTILITIES

STA Application Request

On behalf of the City of Bryan, Texas Utilities, we are submitting this application for Special Temporary Authority. An application for permanent authorization is pending finalization of frequency coordination certification by AASHTO under ID#RSAH09301600756.

The City of Bryan's current radio system is failing and these new locations and frequencies are critical to the operation and supporting communications of the electrical utility system.

★On air testing is required to determine proper coverage in utility plants, substations and offices.

★Testing of linking configuration of sites and stress testing of this system is vital prior to final cut-over from the old system.

★Requesting use of system while final coordination and Letters Of Concurrence are obtained.

Please let me know if you have any questions.

Thank you for your time.
